

## COSMOS CIRCLE Profile

It is a simple pinhole camera.

It is composed of camera body and tube. It comes with a linhof 99x96mm pinhole lens board which is 0.3mm.

The flange focal length of camera is 70mm.

The pinhole is made of 0.01mm thick metal materials. To eliminate burrs, we drilled through 15 times laser. The one comes with camera is 0.3mm diameter, its aperture is about f256. We also provide other diameter from 0.1mm to 1.0mm (Special diameter can be customized as required) .

The view angle of this camera is 102°

There are four flexible locks on the camera's body. To the left, you can lock ordinary 4X5 Film Holder. To the right, you can lock 6X7/6X9/612 Roll Film Holder Back for 4X5 or Polaroid Film Holder Back for 4X5 or Graflex Film Holder.

Its weight is 315g.

Because it is a modular camera, with different parts, you can even use multiple lenses for shooting, not just a pinhole camera!
